

OFFICE OF UNDERGRADUATE RESEARCH

The Office of Undergraduate Research (OUR) is located on the Melbourne Campus. The OUR provides college-wide support and resources to help students participate in research, scholarly inquiry, and creative works through mentored research experiences. Involvement in undergraduate research opens a path for students to broaden knowledge, explore a career, gain research credentials for graduate school, and directly work with an expert in the field of study. The OUR provides a forum for students to publicly share research at the bi-annual Undergraduate Research Exhibition and receive recognition for academic accomplishments. For more information about undergraduate research visit the [OUR's website](#).
